

B2B Growth Operations System

Appointment SaaS / South Africa / account research, prioritization and campaign capacity

PORTFOLIO SIMULATION | SYNTHETIC DATA | INTERACTIVE EXCEL WORKBOOK

BUSINESS BRIEF

A service-business SaaS needs a repeatable way to decide which accounts merit research, personalize outreach and plan capacity before importing records into its CRM.

SYSTEM BUILT

Built a four-tab Excel operating model: 36 fictional accounts across six service segments, a formula-driven command center, an editable campaign planner and a documented operating guide.

DECISION LOGIC

The account score allocates 25 points to pain, 30 to intent, 25 to location count and 20 to staff size. A/B/C tiers and next actions recalculate from source fields. Channel assumptions forecast meetings and research hours without representing achieved results.

CONTROLS AND HANDOFF

Duplicate flags, source and buying-role fields, a research status, owner and next action create a review queue. The handoff explicitly requires verification before any real contact or CRM import.

HELIOBOOK / B2B GROWTH OPS

Portfolio simulation | fictional South African appointment SaaS | 29 Sep 2026

Segment	Accounts	Priority A	Research complete	Share A	Workflow indicator	Value
Salon		6	2	2	33%	Synthetic accounts
Barber		6	2	2	33%	Priority A
Wellness		6	2	2	33%	Research complete
Therapy		6	1	2	17%	Duplicate warnings
Tattoo		6	1	2	17%	
Fitness		6	2	2	33%	

Process	Owner	Output	Control
Research	Researcher	Source + buying role	Evidence before contact
Qualification	Analyst	Score + priority tier	Review duplicates
Personalization	Sales	Contextual opening	No bulk outreach to demo contacts
CRM handoff	Ops	Account + owner + next step	Review before import

Score = pain (25) + intent (30) + locations (25) + staff (20). Thresholds: A ≥75, B ≥55.
These figures describe only the synthetic dataset; they are not business results.

WHAT A CLIENT RECEIVES

Editable workbook with account queue, segment metrics, priority rules, capacity model, exception checks and operating notes. The structure can be adapted to a client's ICP, data sources and CRM fields.
