

Lead Intelligence and Data Quality

Premium travel / Netherlands / intake cleaning, qualification and CRM handoff

PORTFOLIO SIMULATION | SYNTHETIC DATA | INTERACTIVE EXCEL WORKBOOK

BUSINESS BRIEF

A premium travel team needs to turn inconsistent account research into a trustworthy review queue while retaining the original intake and preventing premature CRM entry.

SYSTEM BUILT

Built a four-tab Excel workflow with 32 synthetic intake rows, formula-derived normalization, a QA and qualification table, a decision desk and a field-level data contract.

DECISION LOGIC

The fit score combines annual trip volume (up to 40), traveler volume (up to 32) and buyer type (up to 28). Scores drive triage tiers. A separate gate checks normalized account duplicates, demo email format and Netherlands market scope.

CONTROLS AND HANDOFF

The preserved raw tab shows every input. Four duplicate rows, one email issue and one out-of-market record surface in an exception queue. Reviewable records remain drafts until real source, identity and consent checks.

LUMEN VOYAGE / LEAD INTELLIGENCE

Portfolio simulation | fictional premium travel buyer and partner pipeline | 29 Sep 2026

Quality gate	Records	Segment	Reviewable	Priority A
Raw intake	32	Corporate	7	2
Reviewable	26	Travel advisor	6	1
Duplicate review	4	Event planner	6	1
Email review	1	Luxury concierge	7	1
Market review	1			
Priority A / reviewable	5			

Gate	Rule	Owner	Required evidence
Normalize	Trim and clean account; lowercase email	Data ops	Original row preserved
Deduplicate	Match normalized account names	Research	Manual review before merge
Quality	Score volume and buyer type	Growth	Model assumption, not observed intent
Handoff	Draft stage for reviewable only	CRM ops	Validate company and contact externally

No real contacts, outreach or conversion is represented. Demo email domains are reserved.

WHAT A CLIENT RECEIVES

Editable workbook with auditable source-to-output formulas, quality dashboard, segment breakdown, next-action rules and a CRM-stage recommendation. It demonstrates data entry QA and lead qualification without claiming verified leads.
